

## **Dreamweaver (HTML) Instructional Project**

### **Revision Summary**

Kevin Smith

#### **Fix Assessment**

I changed the permissions of the Google Form to allow everyone to access it. I tested on multiple computers and iPads and it appears to be working correctly now.

#### **Adjust Size of Body Text**

I didn't change this on all pages. I did take one long page and create a video to condense the text. I don't think this is a big issue. I could break up the text into multiple pages, but I'm not sure it's necessary.

#### **Highlight Menu Location**

I didn't change this. I do think it is worth considering for future versions. I may revisit this.

#### **Add Page Title**

Good suggestion. I did this. I added the primary section and page X of 22 to all pages.

#### **Add Letter Spacing**

Good suggestion. I did this. I didn't know about this option in CSS. I've used line-height to improve readability, but never letter-spacing.

#### **Fix Typos**

I fixed the errors noted by one of the reviewers.

#### **Customize Assessment Feedback**

Good suggestion. I did this.
